FOREWORD

“I have a dream...” Almost everything starts with a dream, a vision. With imagination, enthusiasm and a little help from Reynaers, your dream becomes a project that will soon become reality.

Imagine... You have a project. There is nothing more powerful than your imagination. You see a high-tech office building, energy-efficient apartments, sustainable private houses and when it comes to aluminium profiles you can now explore the dreams you have. We will help you to bring your projects to life!

As one of the references in the aluminium building industry, we believe that not only this leadership position is reflected in the quality of our projects but also we should earn it every day and in all projects in which we are involved.

In this book you will find some projects that we have done together with our partners around the world, each with their own architectural characteristics. They are divided into 10 categories.

We hope that this book can inspire you in your dreams and future projects!

The Reynaers team
